Preparing your Photo Slideshow

1. Decide how you want your project structured. *(For example, a common approach to a wedding project consists of three sections...Opening title, Bride's section w/title, Groom's section w/title, Bride & Groom together w/title, Closing title)*
2. Gather all the pictures and music you plan to use, choosing between 20-30 photos for each section and deciding on the music selections for each section as well.
3. Order your **printed photos** sequentially and group them together in zip-lock baggies or a folder. Number the photos on the back (use pencil as ink can transfer to photos and sticky notes easily fall off). For **digital photos**, copy them to a Thumb Drive or CD/DVD. Also, please re-name your photos per section and in the proper order. *(For example, a photograph in Section 2, Picture #5...should be re-named to "section02-05.jpg")*
4. Deliver your photos/music to our studio and we'll handle the rest. Once completed, we'll upload a web preview for your approval of the slideshow before we finish the final disc. **Note: All slideshows receive (1) revision/change order after the initial preview is completed. Further edits are billed at \$75.00 per hour.**

Section 1 (maximum 30 photos per song)

From PIC# _____ to PIC# _____

SONG #1 TITLE _____

CD/Track # _____ Length: _____ min _____ secs

NOTES:
